Introducing Silgan Dispensing's PCR Portfolio

Why choose sustainable packaging?
Because it's what your consumers care about.
Consider these statistics:

88% **less total energy** is used for producing PCR vs. virgin material

71% **of greenhouse gases** are reduced when producing PCR vs. virgin material

52% **of consumers** are willing to pay upwards of 10% more for products with sustainable packaging

1 in 3 **agree** they are more likely to purchase a brand that offers products in sustainable packaging over ones that don't
