

# Introducing Silgan Dispensing's PCR Portfolio

Why choose sustainable packaging?  
Because it's what your consumers care about.  
Consider these statistics:

**88%** **less total energy**  
is used for producing  
PCR vs. virgin material

**71%** **of greenhouse gases**  
are reduced when producing  
PCR vs. virgin material

**52%** **of consumers** are willing to pay  
upwards of 10% more for products  
with sustainable packaging

**1 in 3** **agree** they are more likely to purchase a  
brand that offers products in sustainable  
packaging over ones that don't
