

Designed with  LifeCycle™ Technology

Replay™

Refill // Reuse

Replay™ is a sustainable fragrance solution from Silgan Dispensing, designed in response to and validated by consumer research as well as a strong brand partnership indicating the growing need for an intuitive, seamless refill option. Featuring our patented LifeCycle™ Technology, Replay is an all-plastic, no-mess refill method for a quicker, cleaner experience including an automatic stop that leaves no fragrance in the spout. Easily adaptable to a range of bottleneck sizes, Replay's lightweight design helps to satisfy your brand's goals of superior sustainability, while simultaneously serving consumers' desire for a more graceful fragrance refill experience. Paired with our pirouette screw pump platform, Silgan offers a 360° solution to increase brand image and loyalty.

Replay™

Refilling Made Easy

- Secure, no mess, no spilling
- Fast refilling—20 seconds for a 50 ml bottle
- Automatic stop when bottle is full
- No waste of fragrance left in the spout
- No need to turn on and off while filling
- Easy and intuitive. Just apply and push down
- Adaptable to a variety of bottlenecks
