

PET Roll-on

To Replace Glass // Lowering Carbon Footprint

Our innovative PET roll-on is a sustainable alternative to traditional glass roll-ons, offering a significantly lower carbon footprint and improved recyclability. While maintaining the crystal-clear elegance of glass – with an optional frosted finish – it provides advanced sealing and pack tightness to ensure optimal protection and convenience. This lightweight 4-piece solution features a polypropylene cap, with the option to use recycled materials for the complete pack. Additionally, the bottle area can be customized allowing tailored branding, making it the perfect fusion of sustainability, functionality and premium aesthetics.

PET Roll-on

The perfect solution to replace glass

- Smart 4-piece design: bottle, fitment, ball and cap
- Lightweight and optimized PET bottle
- Standard 1.14" PE fitment and PP ball
- Standard PP screw cap with headstand possibility
- Recycled materials for the complete pack optional
- Saving over 35% in carbon footprint and enhanced recyclability
- Advanced sealing and excellent pack tightness
- Cost-effective and easy bottle customization in stretch blown area
- All parts from one supplier for guaranteed compatibility and performance
