

Premium-Line Scoop Caps

Enhanced Safety // Outstanding Convenience

Our Premium-Line is a sustainable hinged lid with an assembled scoop for Infant Formula, offering unmatched safety, hygiene, and convenience. Its patented TE tab ensures first-use indication without loose parts, meeting future legal requirements. Its easy-to-use reclosable safety clip provides a secure seal with an audible click. The ergonomically designed scoop allows precise, one-handed dosing and is hygienically stored on the cover ring. Made from recyclable, mono-material polypropylene, Premium-Line delivers sustainability without compromise. Also available in ISCC Plus certified PP.

Premium-Line Scoop Caps

When safety and convenience are paramount

- Multi-functional design including unique, convenient and secure features
- Developed to meet future regulations with a no-loose-parts design
- Efficient handling and processability on high-speed capping lines
- Produced in HACCP-approved factories and with ISCC Plus mass balance certification
- Mono-material solution: lid and scoop are made of food approved PP
- Also available in bio-based or chemically recycled material via the mass-balance approach
- Standard design, yet suitable for customization
- Fit on standard tinplate cans

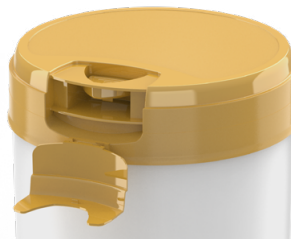

Design features & specifications

- Height: 35 mm (adding 28 mm on can)
- Diameter: 127 mm
- In-mould label possible
- Combination of gloss and matt surface
- Stackable lid-on-lid and lid-on-can

Tamper Evident tab

The unique, patented TE tab ensures first use without generating loose parts.

Reclosable Safety Clip

The reclosable safety clip closes comfortably with an audible click, ensuring a tight and reliable seal. Permanently attached to the lid, making it easy to open and close.

Versatile Cover Ring

Cover ring with two bridges to store the scoop and keep it in place when the lid is closed. These bridges also act as levelling device.

The cover ring has a foldable rim on the inside for an optimal can-lid interaction that doesn't require great force, facilitating pre-centred, efficient capping.

Scoop

The scoop has a wide handle for perfect grip and stability while scooping the precise quantity. Venting slits enhance accurate and controlled dosing.
