

**SealPack**

Enhanced Sustainability // Convenience

SealPack revolutionizes deodorant and antiperspirant packaging. It is sustainable in every way, without compromising on performance. The simplified 3-piece design significantly reduces material usage, while the polypropylene mono-material enhances recyclability. Its excellent sealing properties ensure a hassle-free experience, making it also ideal for travel and e-commerce. SealPack is available in several standard designs, with customization options to meet unique brand needs. This roll-on offers a sustainable edge while providing convenience and reliability to consumers.

# SealPack

Lightweight and sustainable with enhanced convenience

- Lightweight 3-piece design: bottle, ball and screw cap
- Standard 1.4" roll-on ball
- Two standard designs, yet perfectly suitable for customization
- Patented sealing feature improving pack tightness
- PP mono-material solution, PCR possible
- Lowering carbon footprint and enhanced circularity
- Convenient opening and closing
- All parts from one supplier for guaranteed compatibility and performance
- E-commerce proof
