

DNAirless® Solutions

Airless // Harmonious

Whether you are looking for a sophisticated, cost-effective solution or a premium pack for the prestige market, our DNAirless® Solutions deliver. Though each pump is unique, all offer advanced engine technology and design features that elevate the dispensing experience while creating harmony across your portfolio of products.

DNAirless® Solutions

Powerful formula protection

- Protection of the most sensitive formulas with NEA®, a neutral engine using our Pure Path™ technology
- Extra-smooth actuation even with the most viscous formulas
- Convenient and comfortable to use with a 360° application
- Flexible integration into your industrial filling process
- Highly customizable
- DNA 32 offers a broad range of sizes for a unified brand look
- DNA 35 is a cost-efficient pack, available in eco-friendly PCR
