

NEA®

Smooth // Secure

NEA® is a next-generation engine for lotion pumps, offering a Pure Path™ engine for advanced formulas—from serums, lotions and moisturizers to foundations, liquid blushes, concealers and more. Renowned for its soft actuation and ultra-smooth application, it performs beautifully with even the highest viscosity formulas. A self-sealing actuator helps ensure every formula is protected. Combined with a full array of customization options, you can bring your brand to life while still preserving the integrity of your product.

Pure Path™ engine for better formula protection

- Suitable with liquid and viscous formulas
- Ultra-smooth actuation for full range of viscosities
- PBT body option to enhance formula compatibility
- Extra formula protection available via self-sealing actuator
- Wide range of designs and finishes from plastic to metal
- Global supply chain for greater flexibility and speed to market
