Dispensing Closures

A better fit, a better experience

At Silgan Dispensing, we pride ourselves on creating state-of-the-art packaging solutions for the world's most admired brands. Together, our insight, expertise, ingenuity and agility provide our customers and theirs with a better dispensing experience.

Whether you are in the market for a standard or fully customized closure, we will collaborate closely with you on a solution that delivers superior performance, outstanding differentiation and seamless production. And, because we offer many customization capabilities in-house, we're able to create sophisticated closures that fit your needs without compromising speed-to-market.

If you're looking to deepen your understanding of consumer preference, improve product performance and serve up a fresher, safer and more convenient dispensing experience—we're here to help.

Decoration Capabilities

Our decoration capabilities are designed to enhance both the visual and tactile experience of your packaging, supporting stronger brand recognition and shelf differentiation. Leveraging a combination of in-house expertise and trusted external partners, we offer a broad range of solutions that bring added depth, texture and precision to your overall product.

From subtle surface enhancements to more distinctive visual effects, these capabilities are engineered to integrate seamlessly with our closure designs while maintaining performance and consistency at scale. The result is packaging that not only protects and dispenses effectively, but also creates a better brand experience.

Optics

- Color matching capabilities
- Pad printing & labeling
- Hot stamping

Haptics

- Material texture
- Embossing

We understand that packaging aesthetics and attractiveness can drive greater engagement with your customers and improve brand experience. Allow us to work with you on a custom dispensing solution that takes your brand to new levels.

Flip Top Closures

Our flip top closures are one-piece, hinged solutions designed to deliver consistent dispensing performance across a wide range of applications.

Available in smooth wall and ribbed styles for enhanced grip and brand differentiation, these closures feature ergonomic thumb lifts for easy open/close and low-profile, non-protruding hinges for a durable, streamlined package design.

Standard Flip Tops

Key Features

- Logo insert capability
- Lining capability
- Self-cleaning orifice plug design reduced mess and product buildup for high-viscosity formulations (available for select products)

Closure Size	Closure Finish	Seal Type	Lining Optional	Orifice	Emboss	SKU
24-410	Smooth	Arc	Yes	1.5 mm, 3 mm, 4.75 mm, 6 mm	No	PS356

Inverted Flip Tops

Key Features

- Innovative designs for bottles, tubes and tottles
- Optimized for upside-down storage to improve product evacuation and reduce waste
- Controlled performance across a range of product viscosities
- Range of orifice options, providing valve-like performance
- Lining optional sealing for product protection and compatibility
- Clog-resistant orifice designs to maintain clean dispensing
- Matte finish for a subtle look with soft texture

Tube Size	Neck Finish	Closure Finish	Seal Type	Lining Optional	Orifice	SKU
55 mm (2.165")	33-400	Ribbed	Arc	Yes	4 mm Enhanced Flow	PS408
			Liner	Yes	6 mm Baffled Flow	PS412
					4.75 mm x 19 mm Ribbon	PS413
55 mm (2.165")	38-400	Smooth	Arc	Yes	4 mm Enhanced Flow	PS407
					9.5 mm	PS409
					6 mm Baffled Flow	PS410
			Liner	Yes	4.75 mm x 19 mm Ribbon	PS414
					18.5 mm	PS420

Spouted Closures

Our spouted closures deliver precise, directional dispensing for bottles and rigid packaging formats. Built on deep expertise in liquid containment and application control, they are designed to support a consistent, intuitive experience across a wide range of end uses.

A variety of orifice options ensures compatibility with different formula viscosities, while stock and custom solutions—including mono-material configurations—are available to support brand, performance, regulatory, and sustainability objectives.

Open Spouts

Key Features

- Consistent, controlled flow across a range of product viscosities
- Simple, robust design for reliable, repeatable performance
- Clean dispensing profile to minimize drips and product mess
- Flexible sealing configurations to meet application requirements

Closure Size	Closure Silhouette	Lining Optional	Orifice	SKU		
				Combo	Land	Valve
20-410	Soft Edge	—	1 mm, 2 mm, 2.5 mm, 3 mm	—	PS115	PS149*, PS249*
